树的基本概念

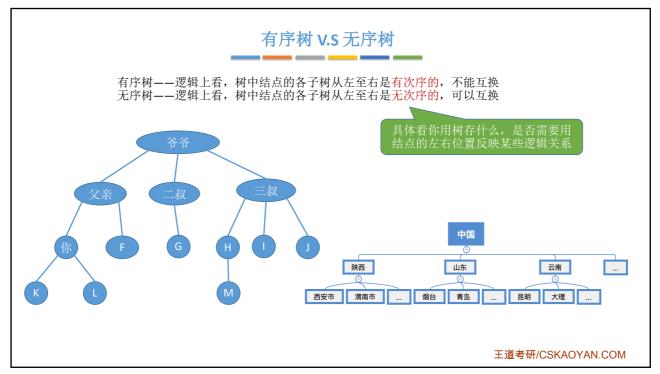

树是n(n≥0)个结点的有限集合,n=0时,称为<mark>空树</mark>,这是一种特殊情况。在任意一棵非 空树中应满足:

- 1)有且仅有一个特定的称为根的结点。 2)当n>1时,其余结点可分为m(m>0)个互不相交的有限集合 $T_1, T_2,..., T_m$,其中每个集 合本身又是一棵树,并且称为根结点的<mark>子树</mark>。
